

Guidelines on the Follow up of Patients with Superficial TCC

DATE: 27 Sept 2012

DATE DUE FOR REVISION: END SEPT 2013

FROM: Mr C Dawson, Urology Lead Clinician – on behalf of
Urology CMT

RE: MANAGEMENT OF PATIENTS WITH SUPERFICIAL TCC

This guideline deals with the management of patients with superficial TCC, and was formulated following discussion of an audit presented to the Urology Department at the Clinical Governance Half Day in June 2012.

Definition of Superficial TCC (for the purposes of this Guideline)

Low risk tumours

- G1/G2
- pTa
- <2cm
- non multifocal

Recommendations

- Any recurrent tumour should be considered as intermediate risk and managed accordingly (see Intermediate risk superficial disease on PCH Urology website – www.pchurology.co.uk/baus.html)
- If no recurrence at **7 Years** then patient can be discharged to GP
